**PROFESSIONAL PROFILE**

# **AGRONOMIST ENGINEERING PROFESSIONAL SERVICES IN SPAIN**

## **ACTUAL NEEDS OF THE AGRICULTURAL ENGINEERS**

### **- UNIVERSITIES**

need of having a slight change in the formal education in terms of teaching more generic and cross-cutting contents so that the new young engineers become capable to manage all the economic, environmental, agronomical and social fundamentals

### **- AGRONOMIC ORGANIZATIONS**

need of a continuous training for the existing professional engineers in order to familiarize themselves and upgrade in the constant technology evolution. This second need is more a "must" than a "need", and we, as "Agronomic Organization", are offering to all our members on a regular basis. Our aim, besides others, is to keep all our members as up-to-date as possible
